### 3.Admission

We issue admission permits and other materials and send them to students.

We issue admission permits and other materials and send them to students.

# SUBJECT

## Anime

Students will learn the animation production process, how to draw the human body from various angles and the male and female body shapes, as well as the unique lines and cuts of animation, and master the three major movements of animation: “walking, running, and turning.”

## Manga

Remembering the process of making comics and how to handle the original paper, they will master the techniques of drawing with G-pens and dot paper. In the process of creating a work, learn how to divide and divide the layout, and how to create a story and characters. Students learn the basics of electronic comics and how to create comics using a PC.

## Illustration

I will provide guidance on creating male and female characters that meet my goals. Understand the structure of the human body when drawing characters, and realize the technique of drawing different poses of the same character. Students will learn the basics of clothing and how to draw pleats.

## Figure

This course focuses on the basic knowledge and techniques necessary for modeling. The first step is to create simple characters in order to understand the characteristics of various modeling materials. After that, you will learn the techniques to make characters appearing in games and anime three-dimensional.

## Dessin

Bone and muscle names. Memory sketches of muscles. Drawing of body shapes and centers of structural lines. Challenging lines for faces, sketches and drawings for modeling.

## Activity

Regular exchange meetings with Japanese students, visits to sightseeing spots around Nakano, a subculture town, and extracurricular classes are also being held.

# TEACHERS

## 小幡公春

He serves as the original artist and animation director for a large number of animations such as "Osomatsu," "Naruto," "Detective Conan," and "Sailor Moon." As a front-line expert in the industry, he contributes articles to various platforms such as TV shows, magazines and books. He is a representative of Pioneer Production, an animation studio affiliated with amps.

## 東島葉子

As an animator at Pioneer Productions, she participated in "Doraemon," "Attack on Titan," "Jujutsu Kaisen 0," "Shangri-La Frontier," "Re: Monster," "Star Nine." With many works including "Bungou Stray Dogs" and "Mushoku Tensei," she is a strong player with a long history of competition. Digital drawing master. Privately, she is a Fukuoka girl who loves comedy.

## 丸谷さゆり

Currently, she primarily works as a key animator, and her hobbies include puzzle solving, chess, and hiking. Her credits include "My Hero Academia," "T.P. Time Cop," "Metallic Lipstick," "Crossfire Daigo," "SAKAMOTO DAYS: Daily Life," "Urusei Yatsura," "Detective Conan: The Million Dollar Five-Pointed Star," and "Doraemon: Nobita's Earth Symphony."

## 勅使河原実香

We teach analogies and numbers. While using analog and digital methods to teach the basics of character posing and shading, we'll support you in creating better work based on what you want to draw. Let's have fun painting together!

## 李晶緹

A graduate of the Fine Arts Department at Changhua Normal University, she began participating in offline events and sharing her work on social media during her college years. She continues to work on commissions through her own studio. She also participated in a short-term study abroad program offered by this college.

## 浅井かおり

In addition to being serialized in the Weekly Shōnen magazine "こんなんみてきたよ!", it also publishes a large number of illustrations and short comic works in the publisher's comic magazines and information magazines. Representative work: Weekly Shōnen Champion "Detective Three Haired Cat Holmes" loves comedy.

## 野村桃香

After graduating from amps Comic Creator Special Course, she won the Shogakukan Shonen Sunday Manga Award while still a student, became the editor in charge, and worked as a lecturer in addition to producing manga. In addition, she is active in many other activities such as doujin activities, creating advertising manga, and designing stamps and character designs as an illustrator.

## 今西勇太

Graduated from Kanazawa University of Art and Technology. A writer active in a wide range of expression fields such as painting, sculpture, and video. The main activities include "Human Factors Landscape" (Youzhang Art Museum / Taiwan / 2018), the creation of the multi-purpose exhibition space "Art Stay", etc. Expand students' performance areas through multi-field knowledge.

## Manoj Mantri

Graduated from National University of Fine Arts, India. He concentrated on the creation of portraits and landscapes through pencil drawings and printmaking. Won many awards. Presented on TV as a traditional Indian sand painting artist. He is also a multi-talented person who is active as a CM, an actor, and a model in movies, TV dramas, etc.

## 杉野郁

Graduated from the Oil Painting Department of Musashino Art University, Painter and illustrator. She was also active in department stores and galleries as a three-dimensional artist. Won the 2016 Audience Award and New Face Award W. In this drawing class, we will teach the basic understanding and drawing methods of human structure used for character creation, as well as methods of expression through various poses and angles.

# STUDENTS VOICES

## 黃于軒

I was away from work for a lot of time, but the event was a lot of fun and I really learned a lot of things that I couldn't learn in Taiwan. The best thing is that Teacher Xiaolin is very helpful and the course is very cheap, which is great value for money.

## 郭倚熏

This course is very cheap and great value for money. I felt like I was experiencing the life of a Japanese college student. The first week I was very scared of being a student, but from the second week onwards, everyone was very nice, especially when I didn't understand something, someone would translate for me. So I think it's worth coming here.

## 王治甯

In the past two weeks, I have learned a lot from the lessons taught by the teacher and some painting techniques. Then I thought there were a lot of cool things about the animation course. For example, the way the animation is shot, the movement of each character, the way it is drawn, the angle of the face, and then the way the hair moves, and then the way it twists. I think this is a good learning experience and I think it will make me stronger. Thank you very much Mr. Obata for your guidance over the past two weeks. You really taught me a lot. ありがとうございます.

## 林詩雅

This month's internship was very interesting and I learned a lot. I learned a lot about work schedules, workplace habits and rules. When it comes to learning drawing, there are still many details to think about slowly. I'm a little scared of 2D animation now, but I'm still enjoying it. I almost cut my hand while making the model, but it was so fun. It was a very productive 30 days, from 7:30 am to 6:30 pm. That's what it feels like.

## 張芸嘉

AMPS's summer courses include animation, comics, illustrations, sketches and models. Each class is taught by teachers from different majors. The teachers are very friendly, so don't worry if you don't understand Japanese. The translators in the class will also help everyone communicate. Let us study more smoothly. I am majoring in animation-related subjects, and I have really benefited a lot from being taught by Mr. Obata here. I have a deeper understanding and practice of animation line quality, character modeling, and mid-cut techniques! In addition, the most refreshing thing is the model class, because it is the first time to make my own hand model, and I find it very interesting! Learn more about Japanese customs and customs~

## 陳毓庭

It was my first time to go to Japan alone for such a long time, and I was both looking forward to it and scared at the same time. When I got off the plane, the teacher picked me up very kindly and enthusiastically and took me to the student dormitory. The teachers are super nice! Chatted with me all the way. Taking classes at amps is very fulfilling and enjoyable. For me, who has never been exposed to model making, it was very touching to be able to make my first model! My favorite class is Teacher Xiao Pan's animation class. Teachers who have learned a lot of amps go directly to the core of the problem when they review. Sometimes after drawing, if I feel like I am lazy and have not corrected the minor issues, I will directly point them out to correct them. XDDD I like this teaching method very much. Also participate in many weekend activities organized by amps. I saw many exhibitions and found them eye-opening! I really like the overall atmosphere and course arrangement of amps. I had a very happy time this month and learned more about Japan's customs and customs.

WE ARE AMPS

## About us

amps is the abbreviation of "anime", "manga", "pioneer" and "school". A talent development school that cultivates pioneers focusing on the animation and manga industry. In addition, it also has the meaning of the plural form of guitar amplifier (amp), and it is also an amplifier for various artists and designers among teachers and employees! It was named with this policy in mind. We have "AMPS International Animation Academy" (a two-year vocational school, accredited by the Ministry of Economy, Trade and Industry's CoolJapan policy), which can accept long-term international students. For details, please refer to our HP.

## OTHER

### amps study abroad courses

amps has "amps International Animation Academy" (a two-year vocational school, accredited by the Ministry of Economy, Trade and Industry's CoolJapan policy),

#### Animation Department Animation Major (Making animations!)

A five-day-a-week, two-year school that accepts international students. There are two subjects and three majors, which is a good choice to learn the major well.

#### Animation Department Stop Motion Animation Major (Making Models!)

Discuss 2D and 3D animation culture. After making models, figures, etc., shoot a new era of stop-motion animation. You can find employment in the model industry or as a prototype engineer.

#### Comics Department Comics Major (Comics, Illustrations)

In order to debut, I can learn various comics techniques and knowledge. In addition to comic content, you can also learn illustration knowledge and techniques.

#### Improve comprehensive drawing skills such as sketching (Art University Examination Tips!)

When applying to art universities and colleges, each school has its own examination. Our professional instructors will provide enthusiastic guidance based on each student's situation.

In addition to courses such as study abroad, summer classes, winter classes, etc., we also offer various courses. Animation, comics, illustrations, models, sketches, junior college (long-term courses of 1-2 years), You can choose seminars (3-month to half-year intensive courses) according to your own purposes. We can also introduce appropriate learning methods based on each student's situation.

### Dual school courses

Dual-school courses for those holding a study visa. While going to school, I also took our amps classes.

amps study abroad courses  
amps has "amps International Animation Academy" (a two-year vocational school, accredited by the Ministry of Economy, Trade and Industry's CoolJapan policy),  
A five-day-a-week, two-year school that accepts international students. There are two subjects and three majors, which is a good choice to learn the major well.

### Working holiday course

If you apply for a working holiday visa and come to Japan, this is a special course that can be completed within the working holiday period (one year). There are many restaurants and other shops around Nakano-Arai Yakushi where amps is located, and we will help introduce you to part-time jobs.

### Short-term and ultra-short courses

If you want to experience animation courses when traveling to Japan, this course is very suitable for you to take. One to several days, small number of classes, experience animation content.]

### School group travel

When group tours such as junior high schools, high schools, and universities come to Japan, we can accept students to experience learning. For more details, please feel free to consult us. Welcome!

## amps, except for teaching activities in Japan

### We also conduct various activities overseas

#### Speech, teaching

APS teachers often go to Taiwan and give lectures and teach in many universities and vocational schools in Taiwan. During the speech, he talked about animation, painting, market trends, etc., and he was very popular among the students every time. We also conduct relatively long professional courses in animation, comics, modeling, etc.

#### various exhibitions

We participate in exhibitions such as anime festivals every year, giving teacher lectures at the booth, displaying students' works, and selling teachers' doujinshi. There are also individual amps exhibitions held in exhibition venues and bookstores.

#### linear course

For several years during the epidemic, we were unable to travel abroad for business. However, many overseas universities and vocational schools are conducting animation courses and exchange meetings with our teachers. Our online facilities are well-equipped and are very popular among students.

So far we have held courses on: drawing, animation, comics, illustration (hand-painted, electronic painting), model (ZBrush), background and landscape, advertising, originality, storyboarding, character design, UI design, etc.

# hahow plan

## Basic Concepts of Beginner Character Drawing

The teachers have very rich teaching experience. For students who cannot come to Japan to participate in the course, we start the course on hahow. Now I have just started to start painting classes with Teacher Xiaobata, and other teachers will start classes in the future.
